

**Aliphatics:**

- N-Hexene
- White Spirit

**Esters:**

- Butyl Acetate
- Ethyl Acetate
- Methyl Acetate

**Amines:**

- Monoethanolamine
- Diethanolamine
- Triethanolamin

**Aromatics:**

- Mixed Xylene
- Solvent Naphtha (C9 & C10)
- Toluene

**Chlorinated Solvents:**

- Chloroform
- Methylene Chloride
- Perchloroethylene

**Oleo Chemicals:**

- Glycerine
- Oleic Acid

**Ketones:**

- Acetone
- Cyclohexanone
- Methyl Ethyl Ketone (MEK)
- Methyl Iso Butyl Ketone (MIBK)

**Monomers:**

- 2 Ethyl Hexy Acrylate
- Acrylic Acid
- Butyl Acrylate Monomer
- Methacrylic Acid
- Methyl Methacrylate
- Veova
- Styrene Monomer
- Vinly Acetate Monomer

**Glycol Ethers/Esters:**

- Butyl Di Glycol
- Butyl Di Glycol Acetate
- Butyl Glycol
- Butyl Glycol Acetate
- Ethyl Glycol
- Ethyl Glycol Acetate
- Methoxy Propanol
- Methoxy Propyl Acetate

**Glycols:**

- Di Ethylene Glycol
- Di Propylene Glycol
- Mono Ethylene Glycol
- Mono Propylene Glycol
- Tri Ethylene Glycol

**Alcohols:**

- 2 Ethyl Hexanol
- Ethanol
- Iso Butanol
- Iso Propyl Alcohol
- N-Butanol
- Methanol
- N Propanol

**Speciality Chemicals:**

- Coalescing Agent
- Pigments
- Iron Oxides
- Pine Oils
- Epoxy Resins & Hardeners
- Epoxy Reactive Diluents
- Antifoams
- Coating Additives
- Amides
- Antioxidants
- Polyolefin Elastomer
- Aluminum Trihydrate
- Zinc Stearates
- Calcium Stearates

**Other Chemicals:**

- Di Methyl Formamide
- Maleic Anhydride
- Nonyl Phenol
- THF
- Nonyl Phenol & Ethoxylates
- Phenol
- Phthalic Nhydride
- MDI & TDI
- Poly Vinyl Alcohol
- Epichlorohydrin
- Propylene Carbonate
- Flexo Solvents
- Neopentyl Glycol
- Benzyl Alcohol

**ADCO LUBE** is a privately owned, ISO 9001:2008 certified organization that was established in 2002. Trice Chemicals is recognized as one of the leading Manufacturers of Detergents and Cleaning Chemicals in the Middle East. We are specialized in manufacturing Kitchen Care Products, Washroom Care Chemicals, Health Care Products, Laundry Chemicals, Floor Cleaners, and Auto Care Products and also we deal with Janitorial and Paper Products. We have experience in all aspects of the private-label process. Our products can be packed and labeled according to clients' specifications. Our products are biodegradable and eco-friendly.

ADCOLUBE is one of the leading stockists and suppliers for Acids, Alcohols, Thinners, Solvents, surfactants, Chemical raw materials for various industries. We are the largest traders and dealers in chemical compounds and we can supply to anywhere in UAE, GCC, and Africa. We are catering to Paint Industries, Detergent Industries, Food Industries, Plastic Industries, Perfume Industries, Water treatment companies, Pharmaceutical companies, Agriculture, Paper Industries, and many more.

# ADCO LUBE

### Sodium Lauryl Ether Sulfate (SLES)

is an anionic detergent and surfactant found in many personal care products (soaps, shampoos, toothpaste, etc.) and for industrial uses. SLES is a very effective foaming agent.

### Sodium Tripolyphosphate (STPP)

is widely used as a component for the production of synthetic detergents, water treatment, as well as in the ceramic, paint, varnish and other industries.

### Butyl Glycol

has many uses, primarily as a solvent, in both the commercial and industrial industries like paint, printing inks due to its high boiling point, textile dyes and as a component of hydraulic fluids.

### Cocamidopropyl Betaine (CAPB)

is available as a viscous pale yellow solution and it is used as a surfactant in personal care products.

### Hydrogen Peroxide 35% & 50%

is a colorless, used principally for bleaching cotton and other textiles and wood pulp, in the manufacture of other chemicals, as a rocket propellant, and for cosmetic and medicinal purposes.

### Ethyl Acetate

is a widely used solvent, especially for paints, varnishes, lacquers, cleaning mixtures, and perfumes.

### Cocamide Diethanolamine (CDEA)

is a non-ionic surfactant with excellent cleansing properties and solvency made by reacting the mixture of fatty acids from coconut oils with diethanolamine.

### Methanol

is a toxic alcohol that is used industrially as a solvent, pesticide, and alternative fuel source. It also occurs naturally in humans, animals, and plants.

### Caustic Soda Flakes & Prills

main uses include being used as a drain pipe cleaner, unblocks drains, removes built up grease from ovens, used to make soap and detergents

### Iso propyl Alcohol (IPA)

is a structural isomer of propanol and provides a wide spectrum of industrial and consumer uses, mostly as a solvent and topical antiseptic.

### Ethanol

is colorless flammable liquid is effective in killing microorganisms like bacteria, fungi and viruses, it is a common ingredient in many hand sanitizers also used in fuels, cosmetics products, and many more.

### Formaldehyde

is used as preservative in food, paints and cosmetics. Used as an antiseptic in medicine, disinfectant in funeral home to improve the yield of fuels it is used in petroleum and natural gas industries, ink manufacturing, and many more.

### Linear Alkyl Benzene Sulfonic Acid

LABSA is an anionic surfactant, whose molecules are characterized by a hydrophilic and a hydrophobic group which is a widely used industrial detergent, washing powder, detergent powder, oil soap, detergent cake, etc.

### Sodium Lauryl Sulphate / SLS Needles & Powder

is a widely used surfactant in cleaning products, cosmetic, and personal care products.

### Fabric Softener Concentrate

are stable aqueous dispersions of cationic materials used for providing fabric softening and static control benefits during laundering.

### Glycerine

is an organic alcohol mixture of sugar and alcohol and is fully miscible in water. It has many uses in nearly every industry as thickening agent in Cosmetics and Foods, Emulsifier and humectant in Cosmetics, Sweetening agent.

### Ethylenediaminetetraacetic Acid (EDTA)

is used to improve stability of some pharmaceutical products, detergents, liquid soaps, shampoos, agricultural chemical sprays, contact lens cleaners and cosmetics.

### Soda Ash Light

is used for production of detergents, chemicals, soaps, textile, paper, food and other sodium compounds and for casting industry, oil refineries also preferred for all kinds of glass manufacture like flat glass, float glass, and more.

### Pine Oil

has a strong piny odor and is miscible with alcohol. It has a strong sterilizing effect and superior ability of deodorization, wetness, clearance and penetration. It is mainly applied in the production of household chemicals.

### Phosphoric Acid

is a component of fertilizers, detergents, and many household cleaning products. It's also used as a food additive, lending acidic properties to soft drinks and other prepared foods, and in a water treatment products.

### Monopropylene Glycol (MPG)

is a clear, colourless and viscous liquid with a characteristic odour and has the formula. This solvent is soluble in water and holds hygroscopic properties, meaning it can attract hard water molecules.

### Polyoxyethylene Nonylphenol (NP9)

Nonionic surfactant for use in cleaners and detergents, agrochemicals, metalworking fluids, paper and textile processing, and paints and coatings.

### Methoxy Propional

is primarily used as a chemical building block for the production of propylene glycol methyl ether acetate. It is also used as a solvent in manufacturing processes for the chemical, automotive and agricultural industries and in paint industries.

### Acetone

is a clear, colorless liquid. It is a solvent that can dissolve or break down other materials, such as paint, varnish, or grease. It evaporates quickly into the air.
